

JOBLINE.AI

Digital Expeditor & Smart Shift Handoff System

Replacing clipboards and tribal knowledge with real-time work order intelligence, structured shift handoffs, and operator credentialing — built specifically for small and mid-size CNC job shops.

Zach Goodbody, Founder & CEO · WeCr8 Solutions LLC · San Diego, CA · Founded 2025 · Market Launch April 2026

zach@wecr8.info · jobline.ai · wecr8.info · Confidential

THE PROBLEM

Manufacturing Runs on Clipboards & Guesswork

65% of manufacturers still use paper or spreadsheets on the shop floor. The cost shows up in scrapped parts, missed dates, and lost tribal knowledge.

— NIST Manufacturing Survey, 2025

Lost Shift Handoffs

Critical machine context and job status vanish between shifts. Every incoming operator starts blind.

Work Order Chaos

No real-time WO visibility. Supervisors guess delivery dates from whiteboards and memory.

NCR Blind Spots

Non-conformance reports tracked on paper — defects recur because patterns are never surfaced.

No Operator Pipeline

No structured way to onboard, certify, or upskill CNC operators. Tribal knowledge walks out with every departure.

Quote History Lost

Estimators re-quote from scratch. Historical job data — actuals vs. estimates — is never captured.

Tooling Tribal Knowledge

Speed/feed and setup data lives in heads. One retirement or resignation and the shop starts over.

One Platform. Full Floor Visibility.

JobLine.ai is the operational core — surrounded by a credential pipeline that trains, certifies, and connects operators across their entire career.

Train → Certify → Operate → Connect — operators own their credential for life, regardless of which shop they're at.

Three Shifts That Make 2026 the Inflection Point.

The manufacturing gap isn't new — but three structural changes in the last 18 months have made the status quo unsustainable for small shops.

01

The Operator Retirement Crisis

The knowledge is leaving — permanently.

The average CNC machinist is 55+ years old. When they retire, every undocumented setup, every tooling shortcut, every customer quirk goes with them. Post-COVID turnover accelerated this from a slow drain to a flood. Shops that don't capture knowledge digitally today are not just inefficient — they are operationally fragile. JobLine.ai is the first tool purpose-built to capture this at the source.

02

No Digital CNC Credential Standard Exists — Yet

GCA + OAP will become the industry default, or someone else's will.

There is no portable, verified, employer-trusted CNC credential in the skilled trades. Every shop certifies differently; every hire starts from scratch. The window to establish the standard is open now. NVIDIA Inception, WIOA federal funding, and CA CTE grants are all actively seeking infrastructure like OAP to fund. In 18 months this window narrows as incumbents respond.

03

SMB Manufacturers Are Actively Looking — Right Now

The appetite has never been higher. The budget has never been lower.

Industry 4.0 investment by AWS, NVIDIA, and Siemens has shifted the conversation on every shop floor. SMB owners who dismissed software 3 years ago are now asking "what should I use?" — and nobody has a good answer below \$100K. JobLine.ai is deployable in under 48 hours at \$49/mo. The product exists. The demand is live. The beachhead market is San Diego; the national market follows the same playbook.

The question isn't whether shop floors go digital — it's whether JobLine.ai sets the standard or someone else does.

Everything the Shop Floor Needs

Work Order Tracking

Real-time WO status, Kanban boards, multi-step routing, priority queues, and station-level visibility.

Smart Shift Handoffs

Structured digital handoffs with machine context, quality flags, and hold reasons — zero knowledge gap.

NCR / Quality Holds

Log non-conformances, scrap, and holds on the spot — tied to job, machine, and operator. Photo attachable.

Quote History

Historical quotes linked to job actuals — enabling accurate estimating and margin analysis over time.

WO History & Audit

Full searchable audit trail from job creation to completion — supports AS9100, ISO 9001, and ITAR.

Machine Context Mgmt

Log setup notes, tooling changes, and offsets — accessible to the next operator before they touch the machine.

Team & Station Mgmt

Assign operators, manage stations, track performance across shifts. OAP employer mode on Team plan.

Supervisor Dashboard

AI Planning Assistant + digital expeditor view with KPIs, Kaizen submissions, and real-time floor visibility.

Designed for the Shop Floor, Not the Boardroom.

Built by a Machinist. Driven by a Mission.

ZOLLER Toolroom of the Year 2026

Invited judge alongside global industry leaders — the premier CNC manufacturing recognition program.

20+ Years CNC — GKN Aerospace, General Atomics ASI & EMS, Tri-Mas Aerospace

Senior CNC programmer. Hands-on aerospace and precision manufacturing. Knows the shop floor firsthand.

Founder: JobLine.ai · GCA · OAP · ToolingHero.us

Built every product from direct production floor pain. Live SaaS, beta customers, April 2026 launch.

MVP Award · Global Industry 4.0 Speaker

Recognized for digital manufacturing innovation. Speaks at CNC and manufacturing industry events.

Addressable
Years 1–3

The Underserved Middle: Shops that have outgrown whiteboards but can't justify a \$100K+ MES.

These are CNC job shops, contract manufacturers, and discrete manufacturers with 5–50 machines. Owner-operated, fast decision-making, chronically under-served by enterprise software vendors.

CNC Machining & Metal Fab

Core launch vertical — high WO volume, shift-intensive. Owner-ops make fast decisions.

Aerospace & Defense

Strict traceability, NCR requirements, AS9100 / ITAR — perfect regulatory fit.

Contract Manufacturing

Multi-customer jobs, quote history critical for margin visibility and re-quoting speed.

Automotive Tier 2/3

High throughput, machine context, quality compliance. JobLine's OAP adds compliance value.

Electronics Assembly

Complex routing, operator certification via OAP, NCR and quality hold tracking.

Workforce Dev / CTE

GCA + OAP qualify for CA CTE / WIOA / Perkins V grant funding — non-SaaS revenue stream.

Per-Seat SaaS + Certification Revenue. Recurring. Sticky. Expandable.

Free

\$0 /mo

Unlimited operators

- ✓ GCA beginner track
- ✓ OAP standalone mode
- ✓ Limited JobLine tier
- ✓ No credit card required

Single User

\$49 /mo

1 operator

- ✓ Full JobLine.ai
- ✓ Work order tracking
- ✓ Station notes + shift handoffs
- ✓ Owner dashboard + reporting

MOST POPULAR

Team
\$149 /mo

Up to 10 operators

- ✓ Everything in Single User
- ✓ OAP employer mode (mentor sign-offs)
- ✓ Talent search access
- ✓ Audit-ready tracking

Enterprise

\$399 /mo

10 seats + \$12/seat/mo

- ✓ All Team features
- ✓ Priority support
- ✓ Custom deployment path
- ✓ API integrations + SAP

Additional revenue: GCA Pro subscriptions · \$12 verifiable certificates (GCA + OAP) · Talent employer access (included with Team) · CA CTE / WIOA grant-eligible training programs · WeCr8 consulting (bootstrap funding)

Enterprise-Grade Intelligence at SMB-Friendly Pricing.

WeCr8 is the only ecosystem combining CNC training (GCA) + operator certification (OAP) + shop floor execution (JobLine.ai) + verified workforce marketplace (Talent) — at SMB pricing.

Early Proof Points & Repeatable Acquisition Engine.

65% still on paper

The baseline is shockingly low — appetite for change is massive and growing.

Post-COVID labor turnover

Knowledge transfer is now a survival issue. Digital handoffs are non-optional.

CNC workforce shortage

Experienced operators retiring. GCA + OAP address a \$6.4B training gap with no digital SMB solution.

Industry 4.0 acceleration

SMBs actively seeking affordable MES alternatives — NVIDIA, AWS investing heavily in industrial AI.

4 Products

Anchor Customer — Aymar Engineering, Santee CA

Precision CNC shop · ~14 employees · Aerospace, helicopter parts & law enforcement assemblies · Owner Brandon Aymar also owns RevShocks + RevGrips (RevRace Founding Manufacturer Partners) — one relationship activates both products.

"This is exactly what our shop has needed for 10 years."

— Brandon Aymar, Owner, Aymar Engineering

Pre-Revenue → \$100K+ MRR

Starting April 2026.

Q2 2026	\$15K MRR	Q3 2026	\$45K MRR	Q4 2026	\$100K MRR	Q1 2027	Series A Prep
First paying customers		10–20 paying customers		30–50 customers		75–100 customers	
· Seed raise closes · GCA + OAP employer pilots · AWS Activate approved · Ayumar Engineering live		· ERP integration beta · VS Code Improvements · CA workforce grant applied · Self-serve onboarding live		· GCA: all 10 test banks live · OAP employer dashboard live · Enterprise pipeline active · Series A prep begins		· Series A prep begins · NVIDIA / ZOLLER discussions · Education grants flowing · Talent marketplace active	

Two Goals. Measured in Paying Shops.

YEAR 1 — Acquire Paying Customers

First paid conversions	3–5 shops	Months 1–3
End of Year 1 paying base	30–45 shops	Month 12
Year 1 exit MRR	\$3.5K–\$6K/mo	Month 12
Blended ARPA	~\$95–\$120/mo	Per account
Monthly logo churn target	< 3%	Sticky once live

YEAR 2 — Continue & Compound (Self-Sustaining)

Year 2 paying base	80–120 shops	Month 24
Year 2 exit MRR	\$11K–\$18K/mo	Month 24
Net revenue retention	100%+	Seat expansion
Enterprise pipeline	Magna / Lear	Long-cycle, Y3

Unit Economics:

Est. CAC ~\$0–\$200 (founder-led, Year 1)

LTV (Single User 12 mo) ~\$588

LTV:CAC > 3:1

Payback Month 1

Primary revenue driver: per-seat SaaS subscriptions · Bootstrap funded: WeCr8 consulting covers runway while SaaS base builds · ARR path: ~\$42K–\$72K annualized at Year 1 exit · ~\$130K–\$215K at Year 2 exit

THE ASK

Seed Round: \$150K–\$300K

SAFE • \$2M valuation cap • No discount

Simple Agreement for Future Equity — standard YC instrument

Every dollar goes directly to building the software
and acquiring paying shops.

50%

Clean ARR, proven unit economics (LTV:CAC > 3:1), Magna / Lear enterprise pipeline open

Entity: Currently WeCr8 Solutions LLC (CA LLC). Under consideration: C-Corp conversion or JobLine.ai as standalone entity — to be confirmed with legal counsel prior to priced round.

GCA + OAP: A Non-SaaS Revenue Stream with Built-In Grant Funding.

\$400M+

CA CTE Incentive
Grants annually

\$16.3M

WIOA ETPP available
PY 25–26

\$150M

CA K12 Strong
Workforce Program

\$1.4B

Federal Perkins V
CTE funding / yr

1

Register as ETPL Provider

Apply to California's Eligible Training Provider List via CalJOBS. Enables WIOA vouchers to flow directly to WeCr8 for individual student training.

2

Partner with School Districts

Districts bring Perkins V + CTEIG match funding. WeCr8 provides GCA curriculum (standards-aligned), OAP certification flow, and hands-on training through partner shop environments.

3

Apply for WIOA / ETPP Grants

30-day accelerated OAP: Orientation through Floor Certification. GCA covers Fanuc/Haas/Siemens in parallel. WIOA vouchers flow to WeCr8 via CalJOBS ETPL.

4

Bill Tuition + Earn Grants

Grant-funded seats + employer tuition + WIOA vouchers per student + OAP recertification fees = diversified, non-SaaS revenue stream running parallel to JobLine.ai.

Six Acquirer Profiles. Three Exit Scenarios.

ERP / MES Vendor

\$2.5M–\$8M

Epicor, Infor, Plex, ECI — an SMB-native on-ramp + credential ecosystem they cannot build cheaply.

Workforce / Credentialing

\$5M–\$20M+

Indeed, Coursera, Credly — the only verified credential pipeline built for skilled trades at scale.

Industrial IoT Platform

\$4M–\$12M

PTC, Rockwell, Siemens, Tulip — the human/workflow data complement to machine sensor data.

Private Equity Roll-Up

\$3M–\$10M

Thoma Bravo, Vista Equity — defensible recurring SMB SaaS + credential moat. Clean ARR.

Automotive / Aerospace

\$5M–\$50M+

Magna, Lear, Raytheon — embed OAP/JobLine across supplier base for AS9100/ITAR compliance at scale.

Staffing / Apprenticeship

\$8M–\$25M

Manpower, NIMS — GCA + OAP + Talent as a nationally recognized portable skilled-trades credential.

Portfolio exit [Jobline.ai](#)

\$10M–\$25M+

Strategic buyer that values both the manufacturing operations layer (JobLine) and industrial intelligence platform.

The Shop Floor of the Future Starts Here.

Train with GCA. Certify with OAP. Run shifts on JobLine.ai.

Let's Talk
